Honeywell

900 Control Station
Protective film

Order Part No.   Qty.   Description
50038816-501   10   0.003" thick clear polyester sheet for 900CS10-00
                                (10 inch display)
50038816-502   10   0.003" thick clear polyester sheet for 900CS15-00
                                (15 inch display)

Document Number   Form: 51-52-33-159
                                Effective Date: October 2009

Summary   The films are a convenient way to protect the front of the 900 Control Station in dirty or abrasive environments such as foundries and concrete plants. The low-tack adhesive allows them to be applied directly to the display. Their large size provides protection for the keys as well as the screen.

Tools required   • Thin non-metallic object (for removing old film)

Procedure

Table 1 Installation

Step	Action
1	Clean the front surface of the 900 Control Station. Note: It is suggested you first access Main Menu>Station Settings>Station Setup>Clean Screen. This will allow you to touch the screen without effect.
2	Peel away the backing from one edge of the film.
3	Align and attach that edge to the corresponding edge of the unit.
4	Slowly remove the remaining backing from the film as you slowly apply the film to the front. Use a wiping action to minimize air pockets. Press entire area to achieve best adhesion.

Table 2 Removal

Step	Action
1	Start by lifting a corner of the film with a non-metallic object.
2	To remove, slowly pull one corner towards the other corners.
