

SGPTPPCFA CALIBRATION GAS FLOW HOUSING

For use with Signalpoint and Signalpoint Pro Gas Detectors

The Calibration Gas Flow Housing is used in sample flow applications when using the Signalpoint range of detectors.

It is also used as an aid when calibrating the Signalpoint range of gas detectors.

The Calibration Gas Flow Housing is screwed onto the accessory thread on the sensor of the detector.

Note: Before attaching the flow housing to a sensor, ensure the seal is in place and in good condition. Ensure a tight fit of the tubing to the gassing nozzle to stop any gas leaking.
